## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of claims 7 and 8 in Paper No. 6 is acknowledged.

### ***Claim Objections***

Claim 6 objected to because of the following informalities: "optical" is spelled wrong in line 8 of claim 6. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Sawai et al. (USPN 4,203,724).

Sawai discloses a method for the measurement of antigens and antibodies that comprises measuring a transmitted light intensities of a solution to be detected containing antigens and antibody components before, during, and after mixing a reagent; which changes the optical characteristics of the solution to be detected attributed to the specific component of interest; determining the concentration (low or high) of the antigen or antibody in solution on the basis of the measured values; comparing the measured values against the known values to detect false measurement
